

WINDSOCK POLE MAST

FLA Ltd, working in partnership with Windsock Company, offer windsock equipment for all types of airfield and industrial applications. A range of windsocks and masts, with and without windsock illumination, are offered for use at:

- Airfields, airports and helicopter landing pads
- Oil, gas and petrochemical installations
- Power stations, water and sewage treatment works, ports, marinas and bridges

Our standard range of mast designs have been used throughout the UK and beyond - both on-shore and offshore. In addition to standard design equipment masts can be made to suit specific site conditions or special configurations

For further information contact the FLA sales desk and a member of the Windsock Company staff will make contact to determine your requirements
