

LADSAF® CABLE VERTICAL SAFETY SYSTEM

The Ladsaf range has basically been condensed and simplified to be sold mainly in kit forms. The main change is the top end termination – which is now factory swaged as opposed to the installer fitted strand grip which means the installers have to order each cable specific to each installation. The other main change is the removal of the top bracket system shock absorber and the new X3 sleeve incorporation a deformable shock absorber. Please ask our sales team for the catalogue outlining the new range.

Select top and bottom bracket kit:

Ladder, ladder with extension, Pole

Number of users

Galvanised or S/S

Eg. Ladder fix , 2 user, galvanized, 611631

Select Rope

Length in meters – last three digits of product code
